Module & Semester Descriptions

Hospitality Business Introduction	3
-----------------------------------	---

Module from a professional perspective

A hotel is not just a place to sleep. Hospital beds are not just somewhere to be ill. A workplace is not a place to hide behind your computer. These are all places where you come into contact with people, where you inspire one another, have group or individual experiences and, in particular, a place where you aim to achieve something. This demands special people. Professionals who possess the talent, proactive nature, inquisitiveness, openness and knowledge to transform any circumstances and situations into the ultimate experience. People who understand that hospitality is the intricate and delicate game, both now and in the future. A journey travelled by both guest and host, in which experience and quality of service are paramount. It demands perfect service that enhances the senses, creating the ideal atmosphere and context. The world over. This is 'a new sense of welcome'.

This module at the very beginning of your course will introduce the broad concept of hospitality business. Introduction and discussion will include innovations, concepts, interrelations and international developments within the work fields of Facility Management, Hotel Management and Tourism & Leisure Management.

Position within the curriculum

First Year

Starting point

No previous (work) experience is required.

Step up to Saxion.

Competences

Innovation in Hospitality Business

Contents

Basic theoretical input will be followed by field trips to relevant companies to enhance the student's picture of the broad concept of hospitality business.

Learning and teaching

Mixture between lectures and field trips. Students will prepare the field trips by gaining information about the company to be visited and write their report as self study.

Assessment

Individual coursework (report, 3 credits), in which they will describe their experiences, compare the above mentioned hospitality work fields and motivate their choice for one of those.

Books and Syllabi:

For books and syllabuses, please refer to the study guide on the intranet.

Step up to Saxion.

saxion.edu

Module from a professional perspective:

This course provides an introductory examination of the tourism and leisure business system, its concepts and terms. It examines the structure of the tourism and leisure industry and operations of its system and its relationship to society, culture, the environment and the economy. The course will provide interdisciplinary perspectives on tourism and leisure and will examine and analyze themes, issues and concepts relevant to each sector.

Position within the curriculum:

first year

Starting point:

Hospitality Business Introduction (previous module)

Competencies:

Operations

Content

In this module the student will get an insight into the operations of the tourism and leisure industry. They will apply several basic research models in order to assess the situation from a customer point of view of these branches such as attractions, accommodations, events and inter-mediators in order to develop a professional eye and view on the industry. Moreover they will be working on the analyses of experiences. Students will also be working on the consumer research and make an analyses of career perspectives within the branch.

Industry visits are part of this program

Learning and teaching

Each week there will be approximately 4 contact hours involved

Step up to Saxion.

Students work in small groups. Each group will get a weekly case. At the end of the module the students will hand in a portfolio which will contain all the worked out assignments.

Assessment

Portfolio: written individual exam on basis of theory offered in books, case studies, lectures and industry visits. For a description of these assignments and exam, please have a look at the syllabus.

Marking

The portfolio will be graded conform the grading sheet with can be found in the syllabus. Grading form, including the criteria are to be found in the syllabus.

Books and Syllabi

For books and syllabuses, please refer to the study guide on the intranet.

saxion.edu

Module from a professional perspective

The hotel industry is booming and during recent years many new developments have taken place; upcoming new markets, development of new products and services, managing human capital, management & ownership structure and use of technology. Basics of Hotel Management focuses on giving students a thorough introduction into this industry and ensuring a stable platform for the rest of their studies and career in the hotel industry.

Position within the curriculum

The module Basics of Hotel Management is part of the first year of the 4-year bachelor degree programme.

Starting point

Basics of Hotel Management will be taught after the students have completed the 'Introduction to hospitality business' module. The knowledge gained during this introduction and a natural affinity with the industry are prerequisites.

Competences

- 5. Operations
- 8. Entrepreneurship
- 10. Hospitality performance

Contents

Two main objectives are at the core of this module:

- Gaining theoretical knowledge
- Applying acquired knowledge during several group assignments

During the lectures and through self-study students will be introduced to the following aspects of the hotel industry: Food & Beverage, Rooms Division,

Banqueting & Events, Spa & Wellness, Maintenance & Security, HACCP & Law, Human Resource & Training, Sales & Marketing, Finance & Control, Architecture & Design, Gaming and Technology.

The group assignments will be carried out as part of a bigger overall project; producing a pre-opening report for a hotel that covers, amongst others, design & operations. Guest lectures and fieldtrips will be part of the program.

Learning and teaching

Basics of Hotel management will be offered during 10 weeks over 1 semester (starting from the 5th week of the first quarter of the semester). The total study load is 168 hours (6 credits).

- Students will work in a group of 4 (design team)
- One lecture per week (all groups / 2 hours)
- One workgroup session per week (4 groups per session / 3 hours)
- One consultation / work session per week (2 groups per session / 2 hours)
- Each student prepares for an individual exam at the end of the course
- Each group will prepare for a portfolio exam consisting of a final presentation, exam assignment and individual process review at the end of the course

Assessment

Basics of hotel management exam (individual): 3 credits

The student is able to show in-depth knowledge of all fields covered during the lectures and in the compulsory literature (essay and MC)

Portfolio exam (group & individual): 3 credits

Pre-opening report: The students will apply the theory and knowledge gained during the lectures and the compulsory literature during several assignments, resulting in a full-fledged concept.

Step up to Saxion.

Hotel presentation: The students (design team) will need to present their developed concept in a convincing manner to the building team (consisting of two lecturers).

Process review: The student produces a written report on his or her individual performance, contribution and group interaction and the subsequent development during the module.

Marking

The final mark for the individual Basics of hotel management exam will be based on a correction model. The final mark for the Portfolio will be based on pre-determined criteria and are described in a correction form. Both exams need to be passed in order to successfully complete this module

Basics of Facility Management (option module)	6
---	---

Module from a professional perspective

The student gains an understanding of operational facility processes. After studying this module the student will be able to:

- Understand the role of Facility Management in organisations;
- Explain the different target groups for the Facility Manager;
- Explain core aspects of service delivery and the service process circle;
- Explain the relation between a service concept and the perceived quality (servicescape);
- Understand the importance of process management for professional provision of services;
- Identify problems in the service delivery process and to design adequate solutions (Ishikawa diagram related to HACCP);
- Design a space and lay-out planning in Visio based on a given brief;
- Design a proposal for a renewed ambiance in Google sketch-up;
- Present a chosen design in an attractive and persuasive way.

Step up to Saxion.

Position within curriculum

The module Basics of Facility Management is part of the first year of the 4-year bachelor degree programme.

Starting situation

Hospitality Business Introduction (previous module)

Competencies

5) Operations

Learning and teaching

- Introduction to Facility Management: definitions, the role of the Facility Manager, the FM customer, market trends and developments, international differences;
- Service concepts: the characteristics of service provision, servicescape, service process circle, customer satisfaction, service desk / front and back office;
- The build environment: business property, space planning, workspace concepts, ambiance, energy, health and safety, security, routing, logistics, legal standards;
- Services: security, catering (foodservice), cleaning, signposting, service desk;
- Process management: problem identification through the Ishikawa diagram, identification of critical control points in the food process (HACCP), process improvement;
- Making a video instruction on a cleaning method;
- Visio instruction;
- Google Sketch-up instruction.

The content is linked to a case study. In groups of 4 the students work on case related assignments.

2 hours of lectures, 2 hours of studio work / instruction, field trips, self-tuition.

Step up to Saxion.

Type of assessment

Group work: a (digital) portfolio consisting of the results of the assignments and a group presentation (10 minutes) + video instruction (5 minutes)

Individual: a written exam (partially) based on the portfolio assignments

Assessment

Group work (PF): 3 ECTS

Individual written exam (S): 3 ECTS

Books and syllabus

For books and syllabus, please refer to the study guide on the intranet.

Hospitality Marketing	6
-----------------------	---

Module from a professional perspective

Given the global growing importance of tourism & hospitality services, the focus of companies in the industry will continue to be on providing tourism and hospitality products that suit consumer needs. Moreover, the industry needs to cope with decreasing loyalty of consumers, the emergence of new distribution channels. This module considers the concepts of marketing and implications of these concepts to the tourism, facility and hospitality industry.

Position within the curriculum

First year

Starting point:

N/A

Competencies

8. Entrepreneurship

Step up to Saxion.

saxion.edu

Content

- The marketing concept
- consumer behaviour
- segmentation
- the marketing mix
- marketing of services

Learning and teaching

The module has a duration of one semester, classes will have a duration of three consecutive hours, this will allow for thorough discussions on each subject, combining theory and practical (group or individual) exercises. This set-up connects to the aim of the module to provide students with knowledge of (services) marketing principles and to apply these concepts to the hospitality and tourism industry. On several occasions guest speakers will be invited to connect the theory to the practice in the hospitality and tourism industry.

Assessment

Written exam (individual) after Quarter 1 consisting of multiple choice questions and a case study (3 credits)

A report and presentation after Quarter 2 (3 credits)

Marking

The exam, presentation and report will be graded by means of a mark based on correction model and pre-determined criteria.

Business English 1	9
--------------------	---

Module from industry perspective

Moderns languages play an important role in the Hospitality Business. As a first year student (and future junior manger) you are expected to be able to use proper English in a business setting. Our aim is to make yourself feel more certain on your knowledge of English and skills and attitude in practical

Step up to Saxion.

situations. Subjects which are dealt with are: grammar, vocabulary, speaking and writing skills. At the end of the modules you have enhanced your knowledge of Business English vocabulary, you are able to use these in interactive task-oriented settings and you are able to produce proper written business products.

Position within the curriculum

First year, quarters 1–3

Starting situation

–

Competencies

9: Communication

Contents

The module is divided in 3 parts and takes 1 quarter each. During the lessons in the first quarter Business English grammar and vocabulary is paid attention to. Moreover, basic discussion skills are trained. The second quarter focuses on Business Communication – speaking skills. The tasks provided are based on or realistic situations. Writing skills are trained in the third quarter.

Learning and teaching

- Students work in groups of max. 16 people;
- Assignments need to be prepared at home;
- 2 contact hours per week during the first and second quarter. 1 contact hour per week during quarter 3.

Assessment

- Written exam and oral exam at the end of quarter 1;
- Oral exam at the end of quarter 2;
- Portfolio at the end of quarter 3;

More information on the exams can be found in the syllabus.

Step up to Saxion.

Module from a professional perspective

This introductory research course is taught from the perspective of solving problems and making decisions within the hospitality, Tourism and Leisure, Facility management industry. Students learn introductory qualitative research methods, as well as how to gather data; evaluate the quality of data; represent data; and apply it in writing a consultancy report. This course involves some industry visits in which observation techniques are practiced.

Position within the curriculum

foundation year

Starting point

No previous research experience is required.

Competencies

Analysis & Networking

Content

In this module the student will get an insight into the scope of hospitality, tourism and leisure, and facility management industry. They will apply several basic research models in order to assess the situation from a customer point of view of these branches. These models include mystery guest reports and Falk and Dierking's interactive experience model. Moreover students will work on hotel classification, hotel descriptions, market segmentation and unique selling points; the difference between expectations (personal agenda) and realization and look at visitor satisfaction. Industry visits are part of this program

Learning and teaching

Each week there will be approximately 4 contact hours involved

Step up to Saxion.

Students work in small groups. Each group will get a weekly case. At the end of the module the students will hand in a portfolio which will contain all the worked out assignments. In week 7 students will put hospitality consultancy into practice with making a quick scan and recommendations for improvement of interactive industry experience of choice. This will be the basis for the presentation in the exam week.

Assessment

- Portfolio
- Presentation
- For a description of these assignments, please have a look at the syllabus.

Marking

The portfolio will be graded conform the grading sheet with can be found in the syllabus. The presentation (individual) is a group assessment: Students/visitors (40%), teachers (60%). Both grading forms, including the criteria are to be found in the syllabus.

Industry Experience	3
---------------------	---

Module from a professional perspective

By means of this introductory work experience students will be able to understand the operations of a company in the hospitality, facility or tourism industry. Moreover students will become aware, and will need to comply with, the business attitude.

Position within the curriculum

first year

Starting point

No previous (work) experience is required.

Step up to Saxion.

Competencies

10. Hospitality performance

Content

This traineeship is an introduction to hospitality, facility and tourism work experience at a participating industry property. Students will be introduced to the operations of the company by participating in daily operations.

Learning and teaching

The module will start off with a plenary introduction. After that students will work in the industry, wherever possible associated with a second or third year student who will introduce the student to the company operations. The traineeship will take place under supervision of a HBS staff member.

Assessment

Report including a company study and an oral examination related to the traineeship

Marking

Both exams will be marked based on pre defined criteria.

Management Principles	6
-----------------------	---

Module from a professional perspective

Having knowledge of, and insight into the basic aspects of management in organizations is essential for all who have the responsibility to plan, lead and control business processes in hospitality industry. This is why there is a focus on these aspects at the start of the education programmes of the Hospitality Business School.

Step up to Saxion.

saxion.edu

Position within the curriculum

First year

Starting point

No specific competences required.

Competencies

- 3. Policy and Decisionmaking
- 7. Change Management

Content

In this module the student will get an insight into the way organisations in the hospitality industry operate compared to basic organizational theoretical perspectives. The focus will be on the link between these general theory and practice.

Learning and teaching

- 3 contact hours every week;
- Students work in small groups;
- Each group gets a number of assignments. During the second half of the semester the groups will be working on finishing their assignments. At the end of the module the students have to hand in a portfolio containing all the worked out assignments.

Assessment

Written exam (S) (30 Multiple choice questions and a few essay questions)

Coursework (W) (several assignments)

Marking

The written exam and the coursework will be graded separately. The coursework will be graded on structure and readability besides the quality of the content.

Step up to Saxion.

Module from a professional perspective

Events have always had a major role to play in human society. They cover all kind of human activity: from sporting and family – to cultural, commercial and organisational. Nowadays increasing public knowledge and technology mean higher expectations of the events. In this module the students will get familiar with the operational side of the events. Events will be presented as special projects students will have to manage. That will involve basic planning, preparation, realisation and evaluation of different kind of events.

Position within the curriculum

Introductory, for the 1st year students, preparation for Events 2.

Starting point

"Events" starts from the basics, no specific prior knowledge required. The module is directly related to the Events 2 course, which students will take the following year.

Competencies

The objective is the development and achievement of the following core competencies:

- Hospitality Performance;
- People Management/HRM;
- The competencies communication and entrepreneurship can be regarded as sub competencies but not assessed as such.

Contents

Within the module students will be asked to organise 2 events, the 1st of them is fictional and the 2nd one is the real life event. Event organisation consists of

everal phases. Developing the competencies students will go through all these phases.

- The initiation phase: The main goal of this phase is to formulate the wishes of your client (what will you be organising for whom). As soon as the client agrees with your proposal, we move on to the second phase;
- The development phase: is a detailed description of the execution of the Event. Based on this preparatory phase, the various departments will be able to make a scenario for the execution of the Event, which is the next phase;
- The elaboration phase: During the elaboration phase, it is extremely important that every detail is seen to, to have thought about everything and to double-check every single detail;
- The realisation phase is the culmination of the event. If all preparations were executed correctly, nothing can go wrong during the Event;
- The rounding off phase. Some of the things we would like to find out are whether we fulfilled the client's wishes, whether we stayed within the budget, etc.

Learning and teaching

The concept of a process-oriented education had a major influence on the module content. The main focus is made on the developing professional competencies. Acquiring knowledge is no longer a goal by itself. Application of the acquired knowledge is what's important.

The following working methods will be used during the module:

- Overview lectures;
- Seminars;
- Workshops;
- Group work;
- Attitude Training ("business conduct and behaviour");
- Participation in the events;

Step up to Saxion.

- Fictional Event presentation;
- The actual event execution.

The module requires initiative and responsibility from the students, as it involves a lot of independent work and study. Close cooperation with the teammates, giving feedback to each other and willingness to receive additional knowledge are the essential components of the learning process during the module.

Assessment

The assessment of the “Events” module consists of two parts: the portfolio and the assessment.

The portfolio consists of the following parts:

- Reflection report of the attitude training “business conduct and behaviour”;
- Reflection report of the two workshops;
- Reflection report of the Cooperation Event;
- Completed assessment form of the Cooperation Event;
- Assessment of the Fictional Event;
- With the Fictional Event, the mark for the execution will be determined by the presentation to the client;
- The assessment is based on the Real-life Event. This will always be an event that a student has actually carried out. The assessment consists of 2 parts, each of which contribute 50 % to the final mark;
- The first part consists of 4 reports, related to the fictional event;
- The 2nd part is the execution of the actual event. The performance during the execution is what will be assessed.

Marking

If the competencies for Events-1 are fulfilled, a student will earn 6 credits (3 credits x 2). If a portfolio is assessed as being sufficient, a student earns first 3 credits. If all parts of assessment (real life event) receive a “sufficient” mark, a student earns another 3 credits.

Step up to Saxion.

Module from a professional perspective

Providing and processing financial data to manage business processes, within an international context. Managing the short-term and long-term monetary movements and financial aspects of an organisation's goods and service flows. The context for Facility Management within internal facility service departments and (commercial) facility providers for TLM within the travel, accommodation and leisure industry and for HM within food & beverage businesses, hotels and hotel chains.

Place in the curriculum

The module Hospitality Economics (Int.) is offered during the first year of the International Programme at the Hospitality Business School. The module is related to all modules that require some degree of business-economic insight.

Starting point

No specific prior knowledge required

Aim**Core competences**

- The student is able to make cost calculations for services and products, in order to on-charge costs to internal clients or determine the sales price and/or back up make-or-buy decisions with hard figures;
- The student is able to set up, review and compare budgets, quotations and contracts.

Sub-competences

- The student is able to mention and distinguish the components of a cost calculation;
- The student is able to determine and analyse cost prices;
- The student is able to make and review decision calculations;

Step up to Saxion.

- The student is able to make, review and compare quotations;
- The student is able to process financial data using spreadsheets.

Content

The use and application of different types of costs including the use of the office Programme Excel. For example:

- Cost terminology;
- Costs, expenses, revenues and receipts;
- Balance sheet, profit-and-loss statement;
- Profit and yield / (rate of) return, contribution margin;
- Costs of commodities and ancillary materials;
- Costs of durable input products;
- Fixed and variable costs
- Total cost price calculation, normal and real capacity load

Working method, contact hours and self-study

During the third and fourth quarters, we will offer lecture and seminar sessions. Parallel to the lectures of the third quartile, there will be an Excel practical of 2 hours a week. This practical will be offered in the form of lectures and seminar sessions.

Prerequisite for participation in one or several tests

None

Test form

There will be a written test (knowledge and practical application) during quarters 3 and 4.

Assessment

Students will receive a mark for both tests.

Step up to Saxion.

Books and readers

For information on the books and readers used, see the study index on the intranet.

Spanish Rápido 1 (option module)	6
----------------------------------	---

Module from industry perspective

Spanish is the world's third most spoken language, after Mandarin Chinese and English, and ranks second in terms of native speakers. If you speak Spanish, you can communicate with almost 500 million people worldwide. Think how many more employment options that gives you in the hospitality business! And if you want to take a trip to Spain or Latin America, a little knowledge of Spanish will go a long way. Not only is learning Spanish becoming increasingly important in terms of the global economy, it can also play a major role in your own personal development. Furthermore is the Spanish passion for living contagious and once you start to learn about their language and culture, you won't ever want to stop.

This module is for those students who want to learn essential practical Spanish for immediate use in the working world. The lessons give you an all-round practical knowledge of grammar, skills, vocabulary and real-life functional language. After two semesters you will be able to use your Spanish on level A1 of the Common European Framework of Reference.

Position within the curriculum

First year, quarters 3 and 4
(6 credits)

Starting situation

No prerequisites, although it is recommended to have experience with learning foreign languages.

Step up to Saxion.

Competencies

9: Communication

Contents

Functional Language in the following situations:

- Meeting people and round the world (talking about nationalities);
- Giving and asking personal details;
- Understanding the world of a company;
- Meeting people at work and job skills;
- Asking and giving directions and shopping;
- Describing an office or a living space;
- Making appointments during a typical day;
- Talking about favourite things;
- Describing how things work.

Organisation of classes, contact hours and self-study

Students work in groups of max. 16 people. 3 contact hours per week during the third and fourth quarter. Instructions, group work, self-study (min. 4 hours a week)

Assessment and Marking

Spanish Escrito Nivel 1S: written exam at the end of quarter 3.

Mark \geq 5.5

Spanish Portfolio: Partial exam: Spanish Escrito nivel 2A: written exam at the end of quarter 4.

Mark \geq 5.0

Partial exam: Spanish oral A: oral exam at the end of quarter 4.

Mark \geq 5.0

Step up to Saxion.

Module from industry perspective

Modern languages play an important role in the Hospitality Business. The fact that you are living in the Netherlands means that you should, besides the command of proper English in a business setting, also have a basic knowledge of Dutch in the four language skills: reading, writing, listening and speaking. After two semesters you will be able to use your Dutch on level A1 of the Common European Framework of reference.

Position within the curriculum

First year, quarters 3 and 4 (6 credits).

Starting situation

No prerequisites, although it is recommended to have experience with learning foreign languages.

Competencies

9: Communication

Contents

- Functional Language: Focus will be on exposure to and practice of general language functions, both in the spoken and written domains of languages (e.g. introducing oneself and others, familiarity with numbers, ordering food, expressing likes and dislikes);
- Language Awareness: An introduction to the nature of language (e.g. comparing and contrasting Dutch with the English language);
- Grammar: Structures necessary for the production of the language functions outlined above;
- Aspects of Culture and Society: a variety of aspects of life in the country / countries where Dutch is spoken.

Organisation of classes, contact hours and self-study

Students work in groups of max. 16 people. 3 contact hours per week during the third and fourth quarter. Instructions, group work, self-study

Assessment and Marking

Dutch Writing S: written exam at the end of quarter 3.

Mark \geq 5.5

Dutch in Practice: Mark \geq 5.5

Partial exam: Dutch writing & reading S: written exam at the end of quarter 4.

Mark \geq 5.0

Partial exam: Dutch speaking and listening M: oral exam at the end of quarter 4.

Mark \geq 5.0

Entrepreneurship in Tourism & Leisure	12
---------------------------------------	----

Module from a professional perspective

The Entrepreneurship in Tourism & Leisure module is about being able to detect and profit from opportunities for viable product/market combinations (for both existing and new products and services). A continuous exploration of the developments in the surrounding environment is central to the module. Other core topics include taking risks, achieving a result, making decisions and having an international scope of interest. The module will deal with authentic and practical situations from the domain of tourism and leisure.

Place in the curriculum*

Main phase 1

Step up to Saxion.

saxion.edu

Starting point

This module builds on the first-year ("propedeuse") T&L module Basics of Tourism & Leisure Management. The subject matter from this module is assumed to be prior knowledge.

Competency*

- 1) Hospitality Business Innovation,
- 6) Financial Management,
- 8) Entrepreneurship

Content

On the one hand, you will learn to work as an entrepreneur within tourism, in particular for a tour operator. The focus within Financial Management will be on calculating and interpreting core data. On the other, you will learn to work as an entrepreneur within the leisure domain by writing a Business Plan for a Leisure organisation. Your financial motivation is an important aspect of this, so that you can use your final report to present yourself to a bank. The lessons will deal with all tour operator aspects, policy issues, financial data and developments in the field of leisure.

Working method and self-study

The module will run for 2 quartiles. Approx. 12 contact hours per week (14 weeks in total).

- Lectures will be alternated with seminars and consultations. In addition, we will organise guest lectures and work visits.
- An individual written test will be central to quartile 1/3, with the main focus on the financial part. In addition, there will be an assessment in quartile 1/3 during which you will assume the role of a Product Manager for a Tour Operator.
- During the lessons in quartile 1/3, we will organise a tour operating game, during which you will run a Tour Operator business as a group.

Step up to Saxion.

- In quartile 2/4, you will assume the role of an entrepreneur such as in the TV programme 'No Going Back'. You will write a Business Plan for a leisure company of your own choice that is for sale.

Testing

Written test: quartile 1/3; this will test your knowledge of finance and tourism.

Assessment: quartile 1/3; you are able to assume the role of a product manager for a tour operator and present your product plan.

Assessment: quartile 2/4; you will individually present your Business Plan to the bank and defend/motivate it. The Business Plan will be written as a group and will be tested individually during an assessment.

Final assessment

The final assessment for the tests will be based on pre-determined assessment criteria. These can be found in the digital reader on the Intranet.

Books and readers

For information on the books and/or readers to be used, see the study index on the Intranet.

Quantative Research	6
---------------------	---

Module from a professional perspective

In their future profession, students will deal with various types of research. Some of them will perform their own research, while others will have such research performed by others; but all of them, however, will be confronted in their work with research results. In all these different roles, it is important that student be aware of the quality criteria applicable to research, so as to be able to determine what the research is worth. In addition, students should be able to critically assess the set-up, execution and analysis of a research project.

Step up to Saxion.

Place in the curriculum

Main phase 1

Starting point

Not Applicable

Competency

2) Trend analysis (Research)

Content

At the end of the Quantitative Research module, students will be familiar with the core concepts from the research methodology. In addition, they will have acquired the relevant skills for setting up, executing and analysing research. Students will be able to make choices during the research process and to motivate these choices.

As the name indicates, the main focus in this module will be on quantitative research. Within this area, the main focus will be on surveys. This type of research involves collecting data from a large number of research units, mostly persons, in a structured manner, for example by conducting a poll (survey). The survey is a frequently used research type in the hospitality business.

Working method and self-study

The module will offer weekly lessons during which the teacher will present the content and the students will practise their research skills on the basis of the lessons exercises. To prepare for each session, the students are expected to read the relevant chapters from the book. In addition, students will work on an assignment for which they will perform quantitative research.

Testing

At the end of quartile 1/3, the students' knowledge and skills will be assessed during a written test (Quantitative research S). At the end of quartile 2/4, the

Step up to Saxion.

students will hand in the report of the research they carried out (Quantitative research W).

Final assessment

The assessment form for the research report can be found in the reader (Quantitative research W).

Books and readers

For information on the books and readers to be used, see the study index on the Intranet.

Intercultural communication skills	3
------------------------------------	---

Module from industry perspective

This module will prepare our hospitality managers of tomorrow to handle cultural differences within an international environment. To have a sound understanding of the possible obstacles but also the benefits when dealing with other cultures, countries and nationalities, is a required skill set for an international manager.

Position within curriculum

As part of the international programme (IP), the module ICS will give students the theory and hands-on practice to truly have a better insight in the international business environment. Therefore, it is the backbone of the international programme that besides the industry-specific modules broadens the students international vision and adaptability for a global workspace.

Starting situation

The students are already internationally exposed through the international classroom, fieldtrips and 1st year modules with a strong international focus. Module content is new for students and will highlight the use of several theories (Hofstede, Trompenaars and Lewis) and emphasize the cultural layers. Through

Step up to Saxion.

theory and practice (debates, in-class exercises, negotiation role plays) the students will be taken from a basic starting point without any required pre-knowledge of intercultural communications to having the skills, insights and practice to manage intercultural differences which is also a good preparation for the students; international traineeship in the 2nd semester.

Competencies

Competence 2//Research

Competence 3//Policy- and decision making

Competence 5//Operations

Competence 9//Communications

Organization of classes, contact hours and self study

This module will consist of 2 X 2 hours of class (in a 'werkcollegezaal'). Per lecture we expect approximately 30–35 students. The lectures will be held in the 1st quarter. Self study in terms of reading theory and preparing exercises will take up an additional 3 hours on a weekly basis.

Type of assessment

Writing a research paper

Assessment

Students will write a research paper with main outline being 'the International Manager'. Students need to apply all theories (Hofstede, Trompenaars, Lewis) as a tool to study a culture or make a comparison of two or more different cultures within a business context. Students will formulate their own research questions and methods resulting in a 2500 word (minimum) research paper.

Books and syllabus

For books and syllabus, please refer to the study guide on the intranet.

Step up to Saxion.

saxion.edu

Module from industry perspective

Foreign languages play a key role in the International Hospitality Business. As a 2nd year student (and prospective junior manager) you are expected to use English in international businesses. You will learn to feel more confident about your knowledge, skills and your attitude in English. Subjects that will be dealt with are: international marketing, social relations, customer services, business meetings. At the end of this module you will have enlarged your knowledge of English business vocabulary, you are able to use these in practical situations and you are able to communicate in written form.

Position within curriculum

Main Phase 1

Starting situation

Successfully having completed Business English 1

Competencies

9) Communication

Organisation of classes, contact hours and self study

During the lessons discussion-, meeting and management skills are practised, that are based on realistic problems or situations. For written communication, report writing will be focused on. During these lessons vocabulary, writing and oral skills will be taught based on the books and material. The module will take place during 2 quarters. Per week (totalling 14 weeks) approx. 2 hours of lessons.

- Students work in groups of van max 16;
- Tasks/assignments need to be prepared before classes.

Step up to Saxion.

Type of assessment

2 Written exams at the end of the semester (quarter 2). 1 Oral assessment: business meeting (end quarter 1). A more detailed description of these assessments can be found in the reader.

Assessment

The assessment consists of 2 written and 1 oral part of the assessment. The written parts focus on report writing and English language in use. In the business meeting to oral skills will be assessed.

Books and syllabus

For books and syllabus, please refer to the study guide on the intranet.

Spanish Rápido 2 (option module)	3
----------------------------------	---

Module from industry perspective

In this module students focus on the following language functions: talking about events from the past, expressing agreement/disagreement, priorities, talking about obligations, company business results, making reservations, asking for things, applying for a job and describing people and objects.

Starting situation

The student has passed Spanish Rápido 1

Position within the curriculum

Main phase 1

Competencies

Communication

Step up to Saxion.

Course programme quarter 1 and 2

Each week, you will work according to the tasks as indicated in the study schedule . Here you can find the items you need to prepare for the lessons and the items that will be discussed in class.

Teaching Method

Study → training → demonstration → portfolio (tasks)→ exam. Students work in groups of max. 16 people. 4 contact hours per week during quarter 3 and 4. Instructions, group work, self-study (min. 4 hours a week).

Type of assessment

Written Exam Spanish Rápido 2 written 1 S

Duration: 120 min. Content: The exam tests the vocabulary, text comprehension and language review.

Written Exam Spanish Rápido 2 written 2 S

Duration: 90 min. Content: The exam tests the vocabulary, text comprehension and language review.

Presentation Spanish Rápido 2 Pr

Duration: 10 min. Content: The presentation is about a topic related to the hospitality business industry.

Calculation of total grade

The total assessment is worth 3 ec. Total grade = written exam 1 is 50%, written exam 2 is 20% and presentation is 30%.

NOTE: for all parts a 5 should be scored as minimum.

Course rules: dates, participation + resit

Presence is required as you wish to do a successful assessment. The preparation for the classes should be done in the students own time.

Step up to Saxion.

Resit for the assessment

If you get less than 5.5 as a total grade for the assessment, you can get a higher total grade for the assessment again:

Option 1: Take the resit of one of the written exams

Option 2: Take the resit for the presentation

NOTE: for all parts a 5 should be scored as minimum.

Books and syllabus

For books and syllabus, please refer to the study guide on the intranet.

Dutch 2 (option module)	3
-------------------------	---

Module from industry perspective

Modern languages play an important role in the Hospitality Business. The fact that you are living in the Netherlands means that you should, besides the command of proper English in a business setting, also have a basic knowledge of Dutch in the four language skills: reading, writing, listening and speaking. After two semesters you will be able to use your Dutch on level A1 of the Common European Framework of reference.

Position within the curriculum

Main Phase 1

Starting situation

To have the basic knowledge in the four language skills reading, writing, listening and speaking on the level of Dutch1 (first year).

Competencies

9: Communication

Step up to Saxion.

Contents

Functional Language: Focus will be on exposure to and practice of general language functions, both in the spoken and written domains of languages (e.g. introducing oneself and others, familiarity with numbers, ordering food, expressing likes and dislikes).

Language Awareness: An introduction to the nature of language (e.g. comparing and contrasting Dutch with the English language).

Grammar: Structures necessary for the production of the language functions outlined above.

Aspects of Culture and Society: a variety of aspects of life in the country/ countries where Dutch is spoken.

Organisation of classes, contact hours and self-study

Students work in groups of max. 16 people. 3 contact hours per week during the first and second quarter. Instructions, group work, self-study.

Assessment and Marking

- Dutch2/ writing S (1): written exam at the end of quarter 1.
Mark \geq 5.0 (25%)
- Dutch2/ writing S (2): written exam at the end of quarter 2.
Mark \geq 5.0 (25%)
- Dutch2/speaking & listening M: oral exam at the end of quarter 2.
Mark \geq 5.0 (50%)

Books and readers

For information on the books and readers to be used, see the study index on the Intranet.

International Human Resource Management (exchange students only)	3
--	---

Module from industry perspective

This module will prepare students to apply human resource management tools to a business in the hospitality industry in an international environment.

Position within curriculum

This module is only offered to exchange students. They will take this module instead of Spanish Rapido 2 or Dutch 2

Starting situation

1st Year International Programme or comparable first year elsewhere completed.

Competencies

4) HRM / people management

Content

Applying HRM theory to an organisation in the hospitality industry. Students will analyse HRM policy and, based on the analysis, make recommendations for points of improvement for the organisation.

Organization of classes, contact hours and self study

3 contact hours (tutorials, consultations and peer assessments) per week during the second quarter.

Assessment and marking

report (groupwork, 1,5 credits) and individual assessment (1,5 credits). Both will be given a mark.

Step up to Saxion.

saxion.edu

Module from a professional perspective

Event Management is organized in cooperation with the professional practice. The events to be organized are designed, planned and executed on the basis of a real order by a real client. This may be an internal client from Saxion or an external client. During all contacts with your client, you will fulfil an important role as a representative of the commercial Event Management Organisation, related to Saxion. **The events will be executed within an international context.**

Place in the curriculum*

Main phase 1

Starting point

Event Management is a logical follow-up for Events 1 from the first year.

Competences

- 1) Hospitality Business Innovation
- 6) Financial Management
- 8) Entrepreneurship
- 9) Communication
- 10) Hospitality Performance

Content

For Event Management you will organise one event. Practical learning environment will stay in focus during the event realisation. Within the Event Management terms like decisive, commercial, realistic, inter-cultural communication and management are central topics.

Just as with Events 1, the client is contacted on the basis of the quotation. Following that first contact the goal of the students is to convince the client in their potential. They will do this by means of an acquisition presentation,

Step up to Saxion.

providing a client with a bright and realistic proposal for the event realisation. Once a client confirmed the intention to go on with the event realisation, the practical execution will follow. Some examples of the events include: diploma presentation, Park de Hoge Veluwe run, conference, seminar, etc, i. e. events of a bigger scale and complexity than the functions students were executing during the Events1 module.

Working method and self-study

During 1 semester, 1 event should be organised as a group. To support the organisation of the event, there will be 2 lectures, 2 seminars and 3 communication workshops. Event Management offers 3 ECs.

Testing

Portfolio consisting of an acquisition presentation, production schedule, evaluation report and the event's practical execution.

Final assessment

The Portfolio to be handed in by the student consists of a number of assignments as well as the event itself. Students will hand in their Portfolios during the test period, to be marked by the teacher.

Books and readers

For information on the books and readers to be used, see the study index on the Intranet.

Traineeship	30 credits
-------------	------------

Module from industry perspective

Getting to know the industry by working on assistant–manager level.

Position within curriculum

Main phase 1

Starting situation

1st Year International Programme completed.

Competences

- 3) policy and decision–making
- 4) HRM / people management
- 5) operations
- 7) change management
- 9) communication
- 10) hospitality performance

Organization of classes, contact hours and self study

- Traineeship 1 runs a whole semester;
- The student works in the organisation as a trainee for 90 days (8 hours per day). The student will be assessed by the organisation on competencies 5, 9 and 10;
- Besides that, the student works on preparing the exams for competencies 3, 4, 5, 7 and 9. Most of this preparation can be done in the students own time.

Type of assessment

- **Portfolio Industry Orientation** (quarter 1 and/or 3): the student can work out tactic and strategic questions, based on certain theory and models;

Step up to Saxion.

saxion.edu

- **Portfolio Business writing** (quarter 2 and/or 4): the student is assessed on certain written documents: the portfolios and some other business documents like internal and external letters/emails and minutes;
- **Portfolio HRM & change management** (quarter 2 and/or 4): the student can work out tactic and strategic questions, based on certain theory and models;
- **Portfolio Optimisation of processes** (quarter 2 and/or 4): the student can work out tactic and strategic questions, based on certain theory and models;
- **Portfolio Quality of Tasks** (quarter 2 and/or 4): the student is assessed by the organisation on the quality of his or her work performance;
- **Portfolio Hospitality Performance** (quarter 2 and/or 4): the student is assessed by the organisation on oral communication and hospitality performance.

→ A more detailed description of these assignments (exams) can be found in the syllabus.

Assessment

- The assessment (individual) of the portfolios takes place according to criteria that are available beforehand;
- The assessment (individual) for 'quality of tasks' consists of a sum of evaluations: company coach (50%), direct colleague 1 (25%), direct colleague 2 (25%).

→ Both assessment forms can be found in the syllabus.

Books and syllabus

For books and syllabus, please refer to the study guide on the intranet.

Step up to Saxion.

saxion.edu

Minor	30 credits
-------	------------

A minor is a coherent and useful combination of course units that have added value for the student's future profession or his or her follow-up study. At Saxion University we distinguish the Bachelor programmes after the first year into a major (150 credits) and a minor (30 credits). A minor can be aimed at broadening or deepening knowledge or at a transfer to an academic master programme. In addition, students can construct a free minor

Broadening

This concerns a minor in which a student makes him or herself familiar with a number of competences which are not included in his/her own programme. Often the student will follow such a minor at another department than his/her own.

Example: By doing a minor Intercultural Work a student from the Facility Management programme can distinguish him or herself from other students of his/her department.

Usually, no admission requirements apply for these minors. However, in all cases the first-year examination must have been passed.

Deepening

This concerns a deepening of competences the student already has. In most cases his/her own programme or college offers such minors, but this is not necessarily the case.

Example: A student from the Tourism and Leisure Management programme wishes to specialise in his/her own field by doing the minor Sports Tourism Policy. This module examines Sport Tourism from a political, economic and business perspective, but will also focus upon the developmental and

Step up to Saxion.

saxion.edu

organisational elements of Sport Tourism; ensuring students have the relevant practical and theoretical grounding required for the Sport Tourism industry.

As a rule, these minors are subject to admission requirements, for they elaborate on already existent competences.

Transfer

In addition there are minors which are specifically aimed at a transfer to an academic master programme. Completing a minor successfully means that the student is able to, (in so far as possible) without delay, transfer to an academic master programme (without having to do a transition programme). For all course programmes within Saxion agreements have been made with the University of Twente. In general, it is also possible to take a minor at an institute with which Saxion does not yet have any agreements.

Free minors

It is also possible to compile a minor yourself. This is called a free minor. A free minor is a minor which the student compiles him or herself from the course units offered by the Saxion University or elsewhere, or from a combination of course units and doing a job.

Step up to Saxion.

saxion.edu

Module from a professional perspective

In this semester, students develop:

- Commercial skills (i.e: financial responsibility, acquisition, commercial communication skills);
- Management skills (i.e: creating and implementing policy, innovation, research, strategic planning, project management);
- An international perspective.

Position within curriculum

2nd semester of the third year

Starting situation

Events 1 and 2, Research, Corporate Finance, English, Communication, Entrepreneurship 1 and 2.

Competences

Innovation in Hospitality Business, Trend analysis and Networking, Entrepreneurship, Communication and Hospitality Performance.

Contents

In this semester, the basics of organizing an event are taken to a higher and more complex level. Students form multi-disciplinary teams in which they work together to come up with a commercially attractive hospitality concept for the bidding of a large international event. Think big: events in the line of World Sports Championships, International Conferences, Cultural capital of the year etc. Based on sub modules: Event Context, Professional Skills, Communication, Advanced Research, Hospitality in Events, Strategic planning, Imagineering & Ambiance, Entrepreneurship.

Step up to Saxion.

Teaching and learning

Mixture between lectures, workshops, guest lecturers and consults. Within their own peer group the student will design their own plan for excursions, company visits and interviews.

Assessment

1. Written exam: orientation on the field of Event Management. Students write an essay in which they learn to argue on paper.
2. Research Paper: report as a result of desk research on a specific topic of Event Design or a related issue.
3. Assessment: Portfolio of products as a result of Networking in the field of International Events, i.e. excursions, exhibitions, company visits and interviews.
4. Portfolio:
 - a. Peerassessment: in which the students inform each other on the Research Paper;
 - b. Event Design: proposal of the commercially attractive hospitality concept;
 - c. Management Review: a review for the jury;
 - d. Sales Pitch: in which the student actually presents his Event Design.

Step up to Saxion.

saxion.edu

Module summary

This module is meant to prepare you for successfully completing the final year of the Hospitality Business School. You will be given some tools to be able to quickly understand– and deal with the modules offered within this year.

Prerequisites

Other students than those already enrolled in the programme: A bachelors degree in a related field such as economics or a minimum of three years of university education in a related field. TOEFL 550, IELTS 6.0

Contents of the module

- Explanation didactic system Final Year;
- Excursion library;
- Presentation training;
- Report writing techniques;
- Group dynamics;
- Effective meetings;
- Guest lectures by professionals from the industry;
- Formulating personal learning goals based on SWOT analysis;

Module Aims and Competences

The hospitality manager is able to communicate effectively, in speaking and writing, in different situations where he has to deal with different kinds of cultures and stakeholders. The hospitality manager is able to practice leadership skills on one or more persons using their competences in an optimal way to gain the best results.

Learning and Teaching

General: This module stimulates working in mixed groups where you are able to learn from each other. Moreover, you will reflect on your own skills and needs and try to relate them to the industry. This will help you to create your own personal learning path for this Final Year.

Way of working: Each class deals with a different topic. This module requires your own effort, creativity and ambition. The teacher has the role of a stimulator, advisor, and motivator to let you obtain the competencies. Interaction is important!

Concrete examples:

- Reading and discussing articles;
- Discussing reflection reports with fellow students;
- Reviewing assignments by means of peer-assessment;
- Presenting to each other.

Assessment Strategy

This module contains 2 moments of assessments (dependent on the planning of the lessons) and will be assessed by means of a portfolio and a presentation. For each of these you will receive a mark. The 2 marks will contribute to your final result. The module aims will be translated into grade criteria. Focus assessment 1: reflection + writing assignment (60%). Focus assessment 2: presentation (40%).

Strategic management	12
----------------------	----

Module summary

This module focuses on Strategic Management and will explore and critically evaluate the concept of strategic management on a world-wide scale.

Furthermore, in this module you will work out a strategic plan on corporate level

Step up to Saxion.

for an existing organisation within your specific hospitality industry, based on a strategic analysis, and translate this plan into plans on relevant functional areas.

Contents of the module (Focus in each quarter)

Quarter 1

- To discuss the concepts of Strategic Management;
- To analyze the strategy of a specific organization in the industry;
- To analyze the environmental developments in business and society and its impacts on the specific organization, by studying trends and scenario's, using PESTEL and SWOT;
- To analyze the industry and the competition, using Porter's diamond;
- To understand strategic capability and position by activity mapping;
- To discuss mission, strategic business units, synergy in the organization;
- To analyze structure and culture of organizations;
- To analyze organizations in financial aspects;
- To formulate objectives on corporate level and on the level of SBU's

Quarter 2

- To develop a strategic plan for a specific Strategic Business Unit by applying strategic methods (e.g. Porter, Ansoff, Prahalad, Wissema), based on the gap analysis;
- To translate the strategic business plan into objectives and plans for functional areas;
- To analyze the impact of a SBU-plan on structure, culture, finance, information and communication, processes and procurement of the company;
- To apply the concepts of competence management and human resource management in relation to structure and culture of the SBU;
- To account for financial and organizational feasibility of the business plan and functional plans;
- To make a project plan for change;
- To present the results in a coherent and consistent way;
- To write a short term business plan.

Step up to Saxion.

Module Aims and Competencies

After studying this module you are able:

- To analyze an organization within the hospitality industry in its environment, using SWOT;
- To translate relevant trends and scenarios in the hospitality industry into possible strategies on corporate level and for functional units in the organization;
- To develop and promote/communicate a strategy for a specific organization in the hospitality industry, based on case studies of existing organizations;
- To describe the characteristics of strategic decisions and define what is meant by strategy and strategic management;
- To explain how strategic priorities vary by level;
- To understand the elements and its relation of the ECS concept;
- To use Pestel and develop scenarios and identify sources of competition within the hospitality industry;
- To understand and prepare and communicate plans for change in an organization in hospitality industry;
- To understand the impact of core competences and continuous improvement in cost efficiency on strategic level in hospitality industry;
- To translate corporate strategy decisions into objectives (plans) for specific functional areas in the hospitality industry.

Learning and Teaching

General: Theory about strategic management will be explained in lectures and by studying the literature and applied right away by discussing articles and cases in seminars. Furthermore, the acquired knowledge will be used to analyze the strategy of existing organizations and to develop possible strategies on corporate and functional level. This will be done in small groups of students; each group focuses on one organization.

Step up to Saxion.

Way of working: The module will be taught in two single weekly hours of lectures, each followed by a two-hours-seminar.

During seminars

Reading and discussing articles and cases

Explaining theories and themes to your fellow students

Discussing interim results by means of peer-assessment

Assessment Strategy

- Individual: Written examination based on a portfolio of articles pre selected and open book. 4 ECTS;
- Group: Presentation of a strategic plan. 4 ECTS;
- Group: Paper, regarding applied strategic plan on specific business functions. 4 ECTS.

Concept development within international tourism & leisure industry	12
---	----

Module summary

This module focuses on the Tourism and Leisure Industry and will explore and critically evaluate, on a strategic level, the latest trends and developments on a world-wide scale within the industry. Based on the trends and developments you will develop a vision, that needs to be implemented in a region of your own choice, which contributes to the tourism and recreational development of that region. Thus, within the chosen region, you have to concretise your vision to a certain concept for a segment in the TL industry. This concept will be the basis for your business plan, which can be realised by a suitable organisation. At the end of this module you will promote your business plan to interested parties in a self-chosen, attractive form.

Step up to Saxion.

Interim portfolios and interim presentations and a confrontation with people from the TL industry will be part of the module. The interim marks will be given on the results per phase. These results will help you to develop a business plan and your promotion.

Contents of the module (focus in each quarter)

Quarter 1

- Research worldwide trends and developments within the TL Industry;
- Formulate the meaning of these developments for an organization within the TL Industry;
- Formulate a personal vision;
- Choose a region that has potential to develop. This region must be chosen with a well-substantiated motivation (characteristics of the region, stakeholders, why that specific region, why that specific development).

Quarter 2

- Develop a concept that anticipates at the chosen development and advances the development of the region;
- Choose (and contact) a suitable organization, which is able to realize your concept;
- Based on the concept: develop a business plan to realize the concept for an organization;

Quarter 3

- Develop a business plan;
- Promote the business plan for interested representatives in the TL industry. The promotion has to be organized as an event in cooperation with HBS SaxEvents.

Module Aims and Competencies

After completion of this module you:

Step up to Saxion.

- are able to develop and promote a personal view at the tourism and leisure industry for a region, based on ambiguous information;
- are able to develop, renew or adjust creative concepts and translate it in an advice for an organization, in a sustainable way, for a certain region in a dynamic changing market;
- are able to plan, organise, coordinate and evaluate the services in the tourism and leisure industry, following the principles of quality demands and in a financially realistic way;
- are able to communicate effectively, in speaking and writing, in different situations where you have to deal with different kinds of cultures and stakeholders;
- are able to practice leadership skills on one or more persons using their competences in an optimal way to gain the best results.

Learning and Teaching

General: This module stimulates working in mixed groups where you are able to learn from each other. A tool that contributes to this is the application of Quick Place, which is a mean of communication to exchange information and to find study material.

Way of working: Every week you will have tutorial seminars for 1 part of the day for 27 weeks in total. This module appeals to your own effort, creativity and ambition. Whereas the teacher has the role of a stimulator, advisor, and motivator to let you obtain the competencies. Interaction is important. Where possible people from the field are invited or will be visited.

Concrete examples

- Reading and discussing articles;
- Explaining theories and themes to your fellow students;
- Discussing interim results by means of peer-assessment;
- Presenting for each other and stakeholders.

Step up to Saxion.

Assessment Strategy

During this module you will have to hand in 2 interim portfolios, the business plan, a final portfolio and give 3 presentations in total. The interim results will contribute to your final business plan, final promotion and final portfolio. The module aims will be translated into grade criteria.

Type of assessments

1. the business plan (4 ECTS)
2. the final promotion (4 ECTS)
3. the final portfolio (4 ECTS)

Industry Development Appraisal (workshops)
--

12

Module summary

During the final year you will join three workshops, two workshops during the first semester, and one workshop in the second semester. In each workshop you will study general themes in small groups using different research methods, like sustainability, ethics, human resources or leadership in the Industry of Hospitality. As a result of the research you will choose a topic from the general theme you find interesting and after studying this topic you will analyse and describe a specific application in the field of the Industry you are studying. Although an outline for the workshop is provided, you will be asked to participate actively in the design and content of the module. You will learn from each other by exchanging results of each others research of the theme as well as the topic you studied. As much as possible, you will choose the workshops you prefer. Hereby we presume that you choose those workshops that will fit into the topic of your thesis. The module will be assessed by means of a report, containing the summary of the research and the description of the specific application.

Step up to Saxion.

saxion.edu

Contents of the module

The module consists of three phases. In phase one you should get an overview of the issues involved in the theme you choose for this workshop by doing a literature review systematically. Next, you will use this overview to choose a topic for phase two. This topic is a more specific aspect of the theme of the workshop and has to be relevant for the Industry you are studying. In phase three you will use your knowledge of the chosen topic to devise an application for a certain region or organisation. Phases one and two are rounded off with a presentation. You will present your findings to exchange information and to learn from each other. The result of phase three is presented in a report. This report also contains a critical evaluation of the process that has led to the report.

Module Aims and Competencies

After completion of this module, you are able:

- to collect, select and analyze data from (automated) systems for information and communication; you use this information to recommend changes that will improve services and ambiance (e.g. systems for making reservations);
- develop, innovate or adjust concepts in a dynamic organization or market;
- to look after the interests of the profession by developing and distributing knowledge of your own professional field;
- to manage projects concerning products and services integrally;
- to cooperate in multicultural teams of variable composition.

Learning and Teaching

- week 1: explain way of working and discuss the plan to approach;
- week 2: brainstorm about the theme; names dropping;
- week 3: research;
- week 4: present results of literature review to each other; interim evaluation of the way of working, quality of the presentation, choice of topics;
- week 5: time to do research and consultation if needed;
- week 6: time to do research and consultation if needed;

Step up to Saxion.

- week 7: present results of literature review to each other; interim evaluation of the way of working, quality of the presentation, choice of topic, plan to approach the devise of the chosen application;
- week 9: hand in report.

Assessment Strategy

The report you hand in at the end of the module is marked. Criteria for the assessment will be deduced from the competencies of the workshop. The report consists of two parts:

1. a description of the application, related to the topic you choose, and motivated by the findings of the research of the phases one and two;
2. a critical evaluation of the way of working.

Each workshop stands for 4 ECTS.

Thesis	21
--------	----

Module Summary

A thesis is a written piece of work (normally no less than 30 pages and no more than 40 pages, excluding appendices) in which a student can demonstrate his/her knowledge and skills in an area relevant to the programme of study. A thesis aims at an in depth analysis of existing, and/or development of new, knowledge and practices. This involves evaluating, criticising, or explaining certain theories. It can be shown how these are, or might be, put into practice or how existing insights might lead to new ideas. The thesis is written individually and cannot be done in groups as it is considered as a masterpiece of the Bachelor study programme. In exceptional cases two students will be allowed to work on their theses together.

The presentation is an oral explanation of the thesis as well as a discussion on a topic close to the one for the thesis. For example, a student might explain the relevance of his/her studies in the Netherlands for his/her professional career or

Step up to Saxion.

look at the feasibility of the recommendations in the light of societal trends in the student's home country.

The presentation enables the student to show management view and ability to generalise across the borders of the particular research topic.

Prerequisites

The entry requirements for the thesis are identical to the entry requirements for the final year.

Module Aims and Competencies

The thesis aims at the following final attainment levels of the student:

1. Work as a starting professional in the field of the Course
 - a) The student is able to solve a problem of fair complexity;
 - b) The student is able to integrate different fields of knowledge and skills;
 - c) The student is able to acquire new knowledge and skills when dealing with practical problems;
 - d) The student is able to apply project management.

2. Be able to work independently as well as in cooperation with others
 - a) The student is able to work independently by carrying out a larger individual task;
 - b) The student is able to cooperate with others by participating in discussions and consultations.

3. Present the results of findings
 - a) The student is able to present results orally and in writing, taking the target group into account;
 - b) The student is able to make proper use of audio-visual aids.

The student should demonstrate attainment of these levels by including these in the thesis.

Step up to Saxion.

Learning and Teaching

One lecturer acts as coach during the whole period of the thesis. The coach assesses proposal, intermediary report, final reports and presentation. Another lecturer acts as second examiner of final reports and presentation. All lecturers of the institute are available for consultation (5 hours per student).

The student needs to apply process management to his thesis. The thesis always starts with a proposal. Based on a first draft of this proposal a coach is assigned to the student. The student needs to obtain a 'pass' to go on with the thesis. This 'pass' is based on the final proposal. Phases in between proposal and final report are to be determined by the student.

Assessment

Report 1 'product' – the actual thesis

Report 2 'proposal' and 'process' a description of the process, including proposal, project plan, and evaluation of the process

Presentation the student presents his or her work, and discusses a topic close to the one for the written thesis showing his/her management view.
