Get Ready for a Smart World

At Saxion we welcome students from all over the world – maybe you as well?

As a University of Applied Sciences we offer a broad variety of courses and use our research to provide knowledge that can be applied in society - both locally and globally. We encourage international and domestic students to find each other and learn from each other.

You will learn how innovations affect your discipline and how you can apply technology and circularity in the development of your future profession. Technology and digitisation have a major impact on our daily lives and are also changing the way we work. In a few years' time, the professions that we now practice will either no longer exist, or they will have taken on a different character. We see this as an opportunity and we encourage and support all of our students to use those opportunities:
Get Ready for a Smart World!

Anka Mulder
President of the Executive Board at Saxion

“I like the practical approach and the endless opportunities to explore the world of tourism.”

“The program is very broad and touches multiple sectors. I did an Internship in Tenerife in the Ritz Carlton and it was the best experience of my life. Take full advantage of what Saxion has to offer.”

Kaloian Arnaudov from Bulgaria
Tourism Management

Smart Solutions Semester

Interdisciplinary collaboration is an important component in our education. You will learn how to combine knowledge and tackle complex issues in real projects. Our Smart Solutions Semester combines all those elements and lets you collaborate interdisciplinarily with other students from different courses on real life cases raised

from companies, institutions and government bodies. Innovative and creative solutions will emerge within your project group which will have a unique mix of experience, skills and talent.

→ [Learn more about the Smart Solutions Semester at saxion.edu/smart-solutions](https://saxion.edu/smart-solutions)

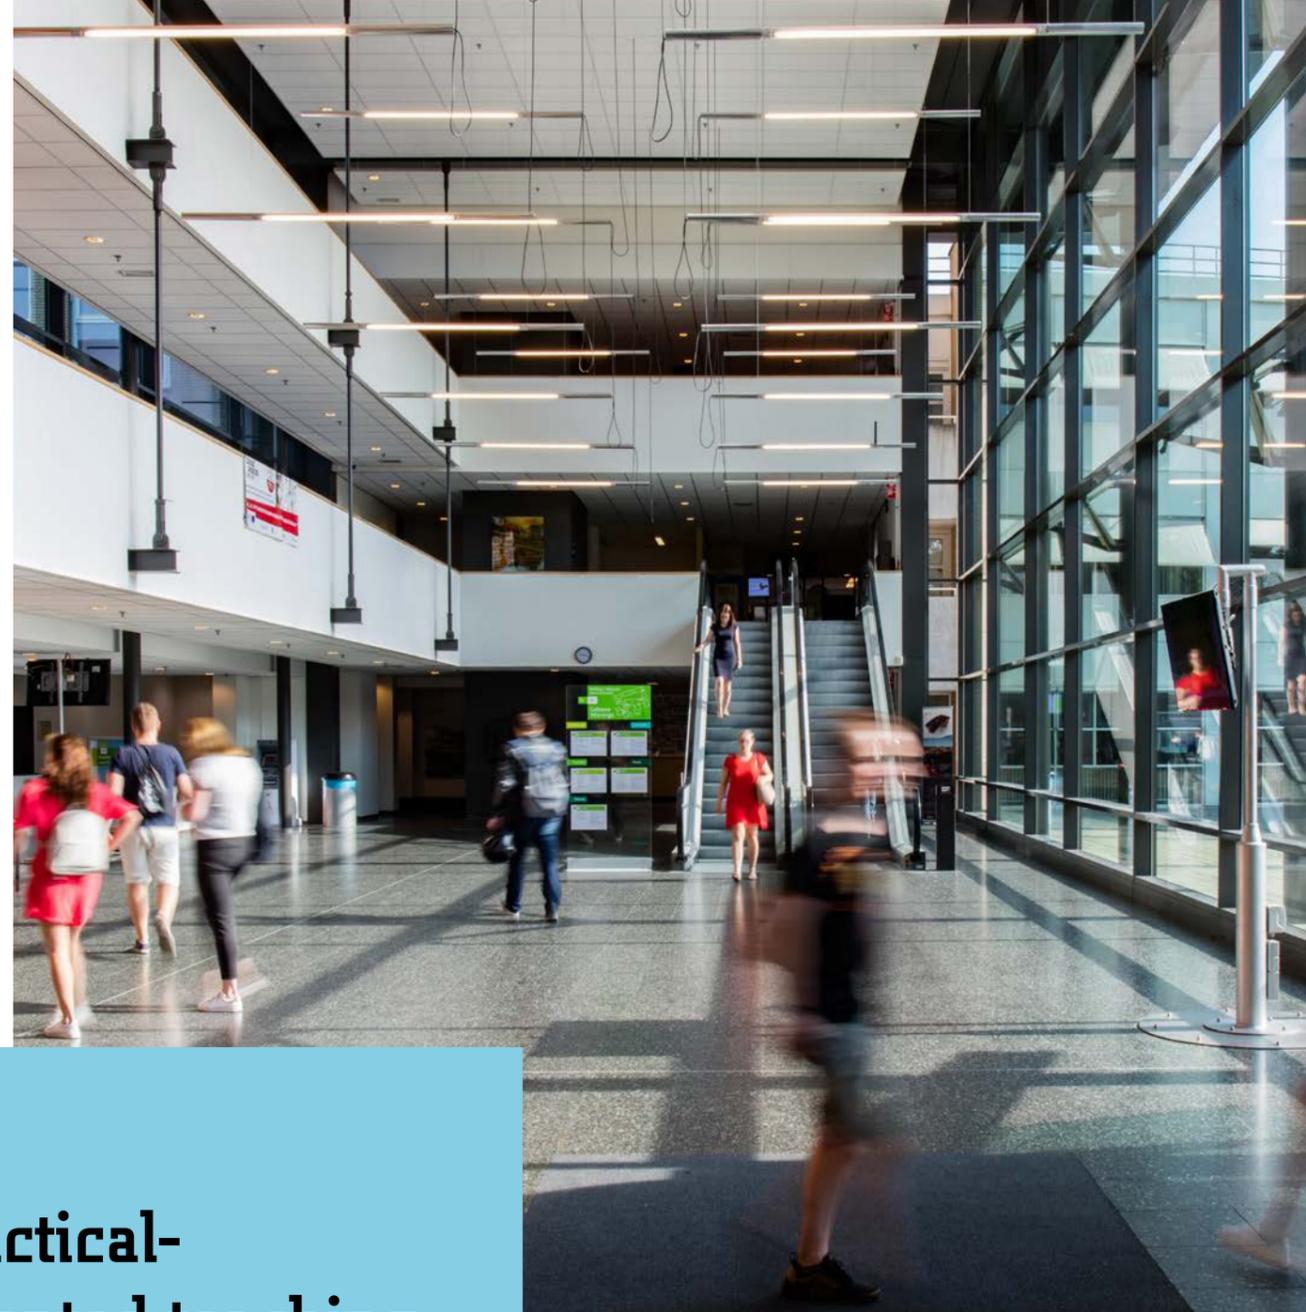

Why choose Saxion?

- You can influence your own study plan at Saxion by co-creating the best educational content for you
- You will learn how innovations affect your future work field and how you can apply technology and circularity in the development of your future profession
- Housing is affordable and relatively easy to find in all cities where Saxion is based
- All Saxion locations are based in the city centre with very good public transportation close by
- We have Honours programmes and Excellence tracks in a Top Talent Programme to maximise your potential in the job market

→ Learn more about the Top Talent Programme at saxion.edu/top-talent

Practical-oriented teaching

At Saxion we offer practical-oriented teaching and conduct research in many different labs, here are some examples:

- FabLab: This is a high-tech public workplace where you have the opportunity to realise an idea yourself via modern digital means of production.
- TextileLab: In our Textile lab you will learn all about the production of textiles.
- CityLab: Here you can work together with residents and companies on smart solutions for society.

→ Learn more about all the different labs at saxion.edu/research-labs

“Last quarter, we had to come up with a new product to launch, including taking care of marketing and the channels of distribution for our product. Finally, we had to present it to 5 investors who were analyzing our project.

Gabriela Botnari from Moldova
International Finance and Accounting

Get in touch with our students on intosaxion.com

“I learned a lot about how to start a company, all those small details that you usually don't expect in higher education.”

“I really appreciated the familiar atmosphere of Saxion, one actually has a personal connection with the teachers.”

Marie von Holten from Germany
former Tourism Management student at Saxion, now working as Marketing Manager at TravelWorks

Studying in the Netherlands

The Netherlands is a popular study destination for students from around the globe. The Dutch educational system is currently ranked amongst the best in the world. So, if you're looking for a bachelor's, master's or preparatory programme abroad, it's a good idea to turn your attention towards the Netherlands!

The Dutch educational system is currently ranked amongst the best in the world

Reasons to study in the Netherlands

- It's one of the safest countries in Europe to live in
- The Dutch are outward looking and this is what brings the world in
- The Netherlands is a top English-speaking country which makes communicating easy
- There is great public transport so you can easily visit every city in the Netherlands
- Many international companies are based in the Netherlands, so there are many opportunities for you after graduation
- With the Dutch Bachelor's and Master's system you will obtain an internationally recognized diploma

Facts & Figures of Saxion University of Applied Sciences

3 Saxion locations

100 Nationalities

27.505 Students in 2019

90% Of Saxion students find a matching job within 3 months after graduation (source: hbo-monitor)

> 3.500 International students

Cosy cities where you will find a good balance between social life and studying

The cities:

- Enschede
- Deventer
- Apeldoorn

Finances 2021 - 2022

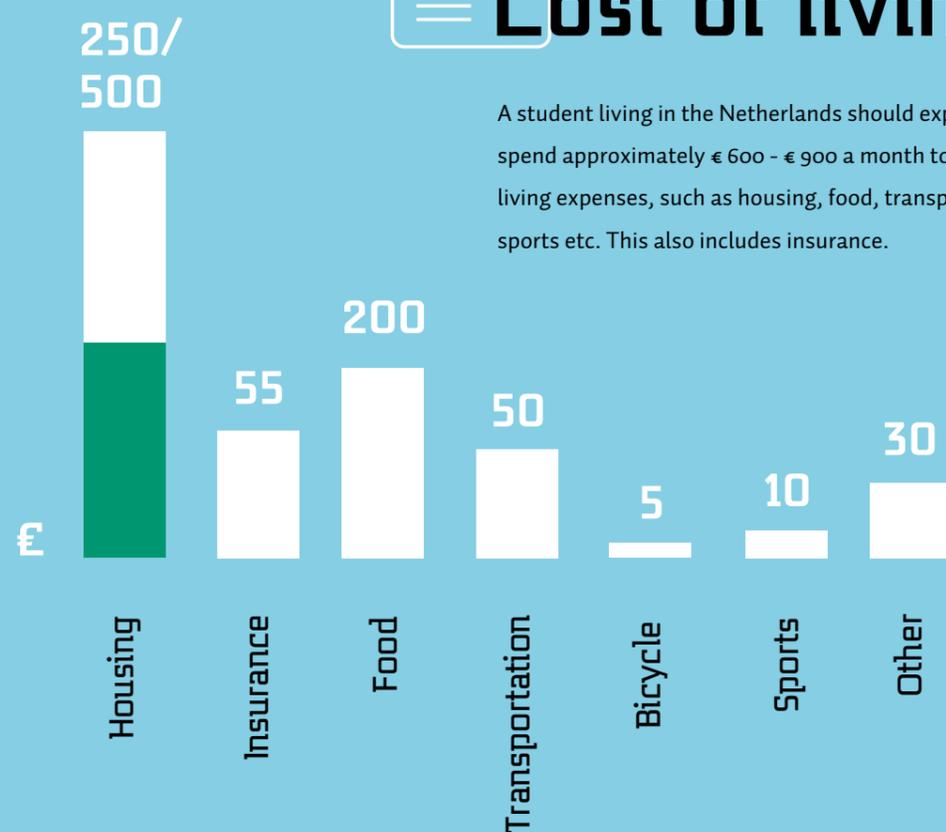

General entry requirements

- You must be admissible to Higher Education through a diploma of secondary education/high school diploma. Sometimes it depends on the curriculum of your previous studies whether your diploma will meet the full described level.
- You must have sufficient English language skills for the specific course. If you do not meet the English language requirements, you can also apply for a Saxion preparatory course.

→ Check the website for specifics about the entry requirements at saxion.edu/entry-requirements

Cost of living

A student living in the Netherlands should expect to spend approximately € 600 - € 900 a month to cover living expenses, such as housing, food, transportation, sports etc. This also includes insurance.

Tuition Fees 2021 - 2022

Tuition Fees EU/EEA

First year Bachelor:	€1.072
2nd to 4th year Bachelor:	€2.143
FREM Master:	€9.950
MBA/MA Master:	€12.000
Other Master:	€2.143

Tuition Fees Non-EU/EEA

Bachelor:	€7.800
FREM Master:	€9.950
MBA/MA Master:	€12.000
Other Master:	€8.900

→ Learn more about the fee structure at saxion.edu/fee-structure. At saxion.edu/programmes you can find the tuition fee per programme

Scholarships

Saxion offers several scholarships ranging from **€2.500** to **€5.000** for excellent and very talented students from outside the EU/EEA. We also participate in different programmes all over the world, such as the Orange Tulip Scholarship.

→ Learn more about our scholarships at saxion.edu/scholarships

Study loan

As an EU/EEA student, you may be eligible for a loan for the tuition fee, provided by the Dutch government. Please consult the DUO website for more information: www.duo.nl (click on 'International visitor'). There may be options in your own country as well, check our website for more information.

Student jobs

A lot of students work next to their studies; however, you would need extra insurance in that case. We also advise you to not rely on a student job in the first year so you can focus on your studies.

International programmes 2021 – 2022

Bachelor's programmes (4 yrs)

Applied Computer Science

Are you interested in programming systems such as a robotic lawnmower, smart thermostat, or self-piloting drones? On completion of this programme, you can work for a wide range of companies as a software and hardware designer, programmer, or developer.

Electrical & Electronic Engineering (Available as Short Degree programme)

You will be qualified to design the technical systems of the future and work worldwide as a hard- and software engineer, as a consultant at an engineering firm, or as a designer of renewable energy systems. Or you can focus on research and innovation.

Creative Media and Game Technologies (Available as Short Degree programme)

This programme combines creativity, technology and experience, with the possibility for you to become a Concept Artist, Visual effects Artist, User Experience Designer, VR Developer or Game Engineer.

Fashion & Textile Technologies (Available as Short Degree programme)

Professionals from the industry with a passion for textile materials will help you get ready to make brave choices for a fair & clean industry. With your knowledge, you are an indispensable link between fashion and textiles designers, makers and buyers.

Information and Communication Technology - Software Engineering

Are you keen to design and develop creative applications or interested in Big Data Technologies and Internet of Things? You will become an ICT expert who knows about the latest innovative technologies.

Physiotherapy

What moves you? In physiotherapy you will become the specialist in movement!

Hotel Management (Available as Short Degree programme)

The Hotel Management programme is particularly suitable for hospitable students with entrepreneurial flair, commercial insight, and an international focus. To help you succeed in the hospitality industry, we pay considerable attention to management skills, communication, and other essential professional qualities.

Tourism Management (Available as Short Degree programme)

You will use hospitality to make connections in an international setting, learn how to transform places into sustainable tourist destinations by means of purposeful and meaningful entrepreneurship and to use technological innovations to fulfil tourism opportunities. Become an expert in destination development, event management, hospitality and responsible tourism.

International Business

With your extensive knowledge of languages, cultures and economics, you will play a pivotal role. You will be able to understand cultural barriers, speak multiple languages and have a thorough knowledge of business administration.

International Finance & Accounting (Available as Short Degree programme)

This study provides you with the financial knowledge and hands-on experience you need, and ample opportunity to develop your intercultural communication skills.

International Human Resource Management

The key to success in any organisation lies with its people. You not only learn how to turn that key, but you also develop the skills needed to become a business-savvy and internationally oriented HRM professional.

Short Degree programmes (1 to 2 years)

A short degree programme (SDP) at Saxion allows you to obtain a full bachelor's degree in a shorter period, depending on your educational background. Some of the bachelor's programmes above are also available as a short degree programme. The programmes **Civil Engineering** and **Marketing** are only available as a short degree programme.

Learn more about the programmes at saxion.edu/programmes

International programmes 2021 – 2022

Master's programmes (1 to 2 years)

Master in Applied Nanotechnology

This Master's programme gives you the opportunity to design and develop innovative products and applications in the field of nanotechnology. The master degree programme Applied Nanotechnology is unique in the Netherlands.

Master in Innovative Textile Development

A unique programme which makes you an expert in textile innovation. In the broadest sense, both technical textiles and textiles for clothing. It will give an excellent springboard to the international textile market.

Master of Arts in Management (MA)

A unique programme in cooperation with the University of Greenwich which prepares managers for organisation-wide leadership and decision-making. It provides you with the skills employers value and the confidence to achieve success in a dynamic business environment.

Master of Business Administration (MBA)

A unique programme in cooperation with the University of Greenwich which prepares managers for organisation-wide leadership and decision-making. It provides you with the skills employers value and the confidence to achieve success in a dynamic business environment.

Master in Facility & Real Estate Management

This double degree programme (diplomas issued by Saxion and the University of Greenwich) prepares future professionals for complex strategic interdisciplinary issues that require skills and knowledge in facility, asset and real estate management. Our passionate lecturers teach you to deal with major challenges in terms of sustainability of the built environment and the anticipation of disruptive technology and the response to it.

Preparatory programmes

Get ready for academic success! The preparatory courses will help you develop the English and study skills you need.

- Preparatory Year
- Preparatory Semester

Short Course

- Risk & Emergency Management
